

EXPORT-IMPORT PRICE INDEX

JULY-SEPTEMBER 2015

The Export and Import Price Index (XMPI), along with the Retail Price Index and the Producer Price Index, is designed to capture the change in prices in Barbados. Foreign trade price indices allow policy makers to analyze the impact of international trade on growth and inflation in the domestic economy. The XMPI will be used to deflate the foreign trade component in the expenditure approach for calculating Gross Domestic Product at current prices thus deriving Gross Domestic Product at constant prices. The XMPI will also be a useful tool in tracking trade flows in real terms by breaking down changes in the value of traded goods and services into price changes, volume changes, or both. In addition, export and import price indices provide an early indicator of inflation pressures on the domestic economy as well as an input for a variety of other purposes including negotiations for trade agreements, analyzing the effects of exchange rates, and measuring competitiveness. This document specifically covers the movement of export and import prices within Barbados for the third quarter of 2015.

PERFORMANCE OF INDEX

- ❖ Import commodity prices declined by 5.8 percent for the period July to September 2015 and by 21.0 percent for the 12 month period ending September 2015.
- ❖ Export commodity prices declined by 4.3 percent for the quarter and by 11.7 percent for the 12 month period ending September 2015.
- ❖ The terms of trade, as measured by the ratio of export prices to import prices, increased by 1.6 percent in the quarter and by 11.7 percent for the 12 months since September 2014.

In this bulletin:

Analysis of:-

- Import Prices on Goods 1
- Export Prices on Goods 1
- Export Prices on Services 2

Appendix of Tables:

- Export Goods Price Index 3
- Export Services Price Index 3
- Import Goods Price Index 4
