

EXPORT-IMPORT PRICE INDEX

OCTOBER-DECEMBER 2021 (REVISED)

The Export and Import Price Index (XMPI), along with the Retail Price Index and the Producer Price Index, is designed to capture the change in prices in Barbados. Foreign trade price indices allow policy makers to analyze the impact of international trade on growth and inflation in the domestic economy. The XMPI will be used to deflate the foreign trade component in the expenditure approach for calculating Gross Domestic Product at current prices thus deriving Gross Domestic Product at constant prices. The XMPI will also be a useful tool in tracking trade flows in real terms by breaking down changes in the value of traded goods and services into price changes, volume changes, or both. In addition, export and import price indices provide an early indicator of inflation pressures on the domestic economy as well as an input for a variety of other purposes including negotiations for trade agreements, analyzing the effects of exchange rates, and measuring competitiveness. This document specifically covers the movement of export and import prices within Barbados for the fourth quarter of 2021.

PERFORMANCE OF INDEX

- ❖ Import commodity prices increased by 8.2 percent for the period October to December 2021 and by 25.3 percent for the 12-month period ending December 2021.
- ❖ Export commodity prices increased by 4.0 percent for the period October to December 2021 and by 12.4 percent for the 12-month period ending December 2021.
- ❖ The terms of trade, as measured by the ratio of export prices to import prices, decreased by 3.9 percent in the quarter and by 10.3 percent for the 12 months since December 2020.

Terms of Trade as at December 2021
